

L BRACKET

The L Bracket is the recommended additional support for wide or very heavy paintings. Two or more of these brackets are used to form a ledge beneath the artwork, which supports the bottom section of particularly heavy or wide paintings, thereby removing the strain from the corner joints.

The L Bracket is particularly useful for hanging heavily glazed works. When the weight of the artwork is supported by the L bracket it is then secured against the wall with Ryman Hangers.

We recommend using the L Bracket in conjunction with our Ryman Hangers. Dependant on the wall structure and fixings used, the L Bracket can provide additional support for artworks up to 500kgs. Please contact us for advice when hanging particularly large or heavy artworks.

PRODUCT SPECIFICATION

Function	Artwork Hanger
Dimensions & loading	170mm high x 50mm wide with a 50mm or 75mm projection. Provides additional support for artworks up to 500kg (dependant on wall structure and fixings)
