

PINNACLE LABEL HOLDER

Display information in an easily accessible format, directly adjacent to the display. The Pinnacle's clean design consists of a Label Holder mounted at the top of a slim 12mm stainless steel rod at an easy to read angle of 45 degrees. This is mounted on a discrete stainless steel baseplate that provides all the necessary stability for your display.

The low reflect acrylic cover minimises any reflected glare from lighting. All Pinnacle components are modular so you can swap label holders and posts to suit your display.

New Update: Now available in wall mounted and plinth mounted options (without base). Please contact us for more information.
